

# Albert "AJ" Snow

479-774-1828 | [ajsnow2012@gmail.com](mailto:ajsnow2012@gmail.com) | [github.com/AlbertSnows](https://github.com/AlbertSnows) | [savyb.fly.dev](https://savyb.fly.dev) | Chicago, IL

## Technical Experience

**Languages:** Java, Clojure, PHP, C#, JavaScript, Rust, Python, C++

**Tools/Frameworks/Libraries:** Spring Boot, JUnit, H2, MySQL, MongoDB, Docker, Kubernetes, GCP, Node.js, Express, React, Git, PostgreSQL

**Skills:** SDLC, Software Architecture, Database Design, OOP, MVC, API/REST, CI/CD, ETL, Functional Programming, Microservices, Software Testing, DevOps, Polygot, Agile, Self-Motivated

## Work Experience

### Back-End Engineer

April 2022 - June 2023

*Peerspace*

- Led team initiative to implement a calendar sync feature resulting in 30% adoption and positive feedback via CX team
- Independently developed new feature sets in several Clojure and JS (Node.js + Express) microservice web applications
- Employed REST API and event-driven asynchronous communication protocols to streamline the development process
- Eliminated downtime of versioned services via orchestration through CI/CD pipelines with Kubernetes and Docker
- Collaborated with team members and stakeholders to translate and scope features into technical design stories
- Initiated new company procedures to refine and increase development productivity (e.g. tests, dev configs)
- Supported new feature growth by seamlessly optimizing, refining, and standardizing schema designs
- Cut business expenses by leveraging advanced problem-solving techniques to identify and debug software faults

### Software Engineer 2

June 2019 – March 2022

*Paycom*

- Initiated design of a new, widely adopted core feature on our team that allowed dynamic field customization
- Shipped software features in an enterprise, MVCS style framework leveraging OOP style architecture
- Adhered to software and procedural regulations (ISO 9001:2015, SOX, PII) while developing and storing sensitive data
- Enhanced software services by extending backend APIs, writing user-facing scripts, and building workflows
- Lowered client wait times by up to 100x by optimizing code, aggregating SQL queries, and optimizing ORMs
- Innovated data storage procedures by employing data modelling and design techniques to store DB schemas
- Saved on development costs by abstracting code design, for example by refactoring code from 1000 to 200 lines

### SDET Internship

June 2018 – December 2018

*Xpanxion*

- Collaborated to develop a prototype client project in Java while undertaking a comprehensive Java course
- Mentored under company coworker to automate C# testing frameworks
- Engaged in mentor-led team sprint meetings and discussed project objectives, focus, and implementation strategies

## Education

**Kansas State University (2019)**

*Bachelor of Science in Computer Science (3.7 GPA)*

## Projects

<b>Personal Website</b> (CLJS, Fulcro)	A website using ClojureScript and the Fulcro framework for personal use
<b>Spring Boot State Machine</b> (Java)	Exploratory projects in spring boot; I also implemented a pattern matching feature
<b>Order State Machine</b> (C++)	Example CLI state machine to experiment with core ETL concepts in C++
<b>Hotshot</b> (CLJS)	Basic API to solve a fun math case; utilized Calva for Interactive Programming.
<b>Game Jam Unity Project</b> (C#)	Small game built by me in a weekend featuring lightbulb-themed puzzle platforming
<b>Thermal Modeling</b> (Python)	College concurrency project; helped Graduate student parallelize modeling code
<b>Utility Functions Library</b>	Repo for experimental code concepts meant to be transferable between languages

## Open Source Contributions

<b>Calva</b>	Collaborated with the lead dev to squash a bug preventing windows users from quick-booting the plugin
<b>Fulcro</b>	Added a feature and documentation to the Fulcro template to build and deploy a production-ready uberjar
